INTRODUCTION

Metasino is a decentralized virtual Casino built on the blockchain to be played in the Metaverse using the Metasino native token - \$Casino. Participants all around the world will come to Casino City to play different casino games and win massive redeemable rewards. Metasino provides a multidimensional Casino experience combining the real world Casino with the multiverse.

Metasino implores creative game theory algorithms to ensure that all participants in the Casino City will abide by the community governance accordingly. Our unique staking and the locking mechanism will ensure all metasino player's worth are valued properly. This 'true worth' will ensure decentralization is maintained and whales do not interfere with the balance in Casino City.

At the same time, participants will be able to win massively and get to build mini Casinos, own properties and control a band of unique mafia (NFTs) in the Casino City.

Our Unique Idea

Bringing the classic Casino to the Metaverse, playing with other real people in the Casino City, owning properties and controlling mafias for REAL MONEY.

Purpose

This is a detailed summary of Metasino and **how to participate, stake, engage with other participants and also with the Marketplace - MetaSwap**. Blockchain and web3.0 is leading a massive disruption in the techsphere, but Casinos are not being carried along - Sure there are online Casinos but they are yet to embrace the world of decentralized, no-KYC-freedom DeFI/Dexes have recently created.

This paper is not highly technical as we have tried to lay bare intricate terms to simplified English words that can be well understood.

CASINO GAME PLAY

Metasino is a Casino game played by wagering on Casino games with other participants from around the world.

To participate in the casino games, a user has to purchase Metasino gameplay chips with Metasino native token \$CASINO. Once the chips are acquired, a user can engage with other users to win massively.

In addition, \$DYCE token will be the in-game rewards token for other games in the metaverse. Players can earn \$DYCE by playing other arcade games in the MetaSinoverse. Launch of this token will come in Q2 of 2022 as stated in the roadmap.

Note that MetaSinoverse and MetaSino Metaverse mean one and the same thing and both can be used interchangeably throughout this lite paper.

Governance

- \$CASINO token shall serve as a governance token of the MetaSinaverse

With these token, the higher the quantity held by a member of the consensus, the higher the person's chance of influencing decisions via voting on key proposals by the team or the MetaDAO.

Marketing tip

- There will be organized giveaways with tasks, giveaways on discords and airdrops of chips

Staking

Staking is done in different tiers according to \$Casino token purchase

Discounts for a tiers accordingly for instance 50% off etc

Losing a game makes you lose discounted value, winning a game gives you full rewards

When you stake, you earn stables which can be redeemed for chips at a discount

Road Map

Q4 2021

- Create official social media platforms viz Twitter, TG, Discord, YouTube
- Marketing [Phase 1]
- Create metasino.io website
- Private sale
- Public sale

Q1 2022

- Marketing [Phase 2]
- Partnerships with GameFi, SandBox, Faraland and other VCs for further development.
- Engage community members with Telegram chat 2D games and share winner prizes.

Q2 2022

- AMA sessions
- Listing on Coinmarketcap and Coingecko
- Launch Metasino's browser Indie game
- Launch of in-game token for buying upgrades, collectibles, adventure loot boxes and exchanging NFTs

Q3 2022

- Marketing [Phase 3]
- Creation of Metasino Launchpad for Blockchain free Play-to-earn Indie games.
- Launch of Metaswap for exchanging of In-game NFTs, collectibles and loots.

Q4 2022

- Collaboration with Unreal Engine to build 3D adaptations of some Metasino games for Virtual reality (VR) and Augmented Reality (AR) play.
- Creation of Metasino Land (A simple photo of 3D rendering will be created and sent to Community to show them seriousness)

Q1 2023

- Marketing [Phase 4]
- Launch of the Metasino Decentralized Autonomous Organization (DAO); the MetaDAO
- Metasino eSports competition in partnership with Veracity \$VRA for exclusive broadcasting.

Q2 2023

- AMA sessions
- Metasino contract audit by Certik and Slowmist
- Launch of Metasino on more Blockchains to expand the metaverse dominance.
